BAT Legal UK Copilot Lab Guide

Hands-on lab guide | Copilot Chat, Analyst, Researcher, Copilot in the apps and Agent Builder | Legal UK, Copilot Functional Week

SYNTHETIC TRAINING MATERIAL - Fictional patents, competitors, processes and contacts. Not official BAT information, policy, data or legal advice.

LAB GOAL: Use Copilot to question a patent portfolio spread across many spreadsheets, compare it with competitor filings, cut the time spent chasing colleagues, and build and test two agents: a Patent Portfolio Agent and an IP Knowledge Assistant that answers the questions IP Legal gets asked again and again.

Part	What you do	Session	Time
A	Warm-up: Work vs Web, personalisation and which tool when	Both	10 min
B	Patent portfolio, competitor comparison and personal efficiency exercises (choose three)	Wednesday	30 min
C	Build and test the BAT Patent Portfolio Agent	Wednesday (optional)	15 min
D	Build and test the BAT IP Knowledge Assistant	Thursday	30 min
E	Wrap-up: share one output and one improvement	Both	5 min

How we will work

- Wednesday (about 7 people): work individually or in pairs. Everyone completes Part A, then chooses three Part B exercises. If time allows, build the Patent Portfolio Agent in Part C.
- Thursday (about 13 people): work in pairs, for example 5 pairs and 3 individuals. Complete a short Part A, then everyone builds their own IP Knowledge Assistant in Part D so each person leaves with a working agent.
- In a pair, one person drives Copilot and the other checks the output against the success check; swap drivers for the agent build.
- At wrap-up, three volunteers share one output each: one portfolio or competitor finding, one agent test that held the boundary, and one improvement.

Before you begin

Required files (synthetic)

File	Use
BAT_Demo_Patents_Europe.xlsx	Exercises B1, B2; Patent Portfolio Agent knowledge
BAT_Demo_Patents_Americas.xlsx	Exercise B2; Patent Portfolio Agent knowledge
BAT_Demo_Patents_APAC.xlsx	Exercise B2; Patent Portfolio Agent knowledge
BAT_Demo_Patents_MEA.xlsx	Exercise B2; Patent Portfolio Agent knowledge
BAT_Demo_Competitor_Patents.xlsx	Exercises B3, B4; Patent Portfolio Agent knowledge
BAT_Demo_IP_FAQ.txt	IP Knowledge Assistant knowledge (questions Q1 to Q15)
BAT_Demo_Invention_Disclosure_Process.txt	IP Knowledge Assistant knowledge (seven-step process)
BAT_Demo_RD_Technology_Briefs.txt	IP Knowledge Assistant knowledge; exercise B4
BAT_Demo_IP_Contacts.txt	IP Knowledge Assistant knowledge (who to contact, turnaround times)
This lab guide, Appendix A	Fictional email thread for the personal efficiency exercise B6

Recommended setup

- Save all files to your OneDrive in one folder, for example "BAT Legal UK Lab", so Copilot can reference them by typing / and the file name.
- Open Microsoft 365 Copilot in a browser tab and Agent Builder in a second tab.
- Use only the synthetic files. Do not paste real matters, unfiled invention details, privileged advice or personal data into prompts.
- Treat 28 October 2026 as today in every date-based prompt so your results match the success checks.

Scenario

BAT's IP Legal team in the UK manages a (fictional) patent portfolio of 125 patents and applications in 24 families, held in four regional workbooks. In real life this data sits across hundreds of spreadsheets. Ahead of Q1 planning, the General Counsel has asked for three things: a clear view of the portfolio and the renewal budget, a comparison with Competitors A, B and C, and less time lost answering the same questions and chasing R&D for information.

In this lab you will answer those requests with Copilot, then build two agents so colleagues can get the same answers themselves.

Every output is a draft for a qualified reviewer. Copilot and the agents never give legal opinions on infringement, validity or freedom to operate, and never replace IP Legal's

judgement.

Part A - Warm-up: which tool when (10 minutes)

A1 Copilot Chat - Work vs Web

Open Microsoft 365 Copilot Chat. Run the same prompt twice in new chats: first with Web selected, then with Work selected.

Prompt A1.1 - Same question, two modes

What are the open items I need to follow up with IP Legal or R&D this week? List who, what and when.

Success check: Web gives generic advice on managing follow-ups. Work returns items from your own emails, meetings and chats, with names and dates. If your mailbox has no patent-related items, Work says it found little; that is expected in a demo tenant.

A2 Personalisation with memory

Prompt A2.1 - Teach Copilot

Remember that I work in BAT IP Legal on patents, my main stakeholders are R&D Technology Area Leads, and I prefer a short answer followed by a table.

Success check: Copilot confirms it has saved this to memory.

Prompt A2.2 - See the benefit (new chat)

How should I prioritise patent renewal decisions this quarter?

Success check: The answer is framed for IP Legal and R&D stakeholders, and arrives as a short answer plus a table without you repeating any context. Then open Settings and more, Chat settings, Personalization to see and delete the memory.

A3 Which tool when

Tool	Use it when	You will try it in
Copilot Chat (Work)	You need answers from your own emails, meetings, chats and files	A1, B6
Copilot Chat (Web)	You need public, general information	A1
Copilot in Excel	You are analysing one workbook that is already open	B1
Analyst	You need calculations or charts across several spreadsheets	B2, B3
Researcher	You need a structured, cited report combining many sources	B4
Copilot in PowerPoint, Outlook, Teams	You are creating or acting inside that app	B5, B6
An agent	Many people repeat the same task with the same knowledge and rules	Parts C and D

Part B - Wednesday exercises (choose three, about 10 minutes each)

B1 Excel - Analyse one regional workbook

Open BAT_Demo_Patents_Europe.xlsx (sheet Europe, table Patents_Europe) and select Copilot on the Home ribbon.

Prompt B1.1 - Portfolio by status

Count the patents in this table by Status and show the result as a small table with a total. Do not invent data that is not in the table.

Success check: 45 patents in total: Granted 29, Under opposition 8, Pending 5, Lapsed 3.

Prompt B1.2 - Renewals due

Treat 28 October 2026 as today. List the patents whose Next renewal due date falls in the next 90 days, sorted by date, with Family ID, Jurisdiction and Annual renewal fee (GBP), and give the total fee.

Success check: 5 patents totalling £2,378, starting with FR-DEMO-100077 (FAM-017) on 5 November 2026.

Prompt B1.3 - Chart by technology area

Create a column chart of the number of patents by Technology area and add it to a new sheet.

Success check: Oral nicotine is highest (11), then Heated tobacco (10) and Vapour (9).

B2 Analyst - Combine four regional workbooks into one portfolio

In Microsoft 365 Copilot, open Analyst from the agents list. Attach the four BAT_Demo_Patents files (Europe, Americas, APAC and MEA).

Prompt B2.1 - One portfolio view

Combine these four regional files into one patent portfolio. How many patents and patent families do we hold? Show a table of Technology area by Status with totals, and tell me which technology area is largest.

Success check: 125 patents in 24 families: Granted 66, Pending 33, Under opposition 14, Lapsed 12. Oral nicotine is the largest area with 41 patents.

Prompt B2.2 - Renewal budget

Treat 28 October 2026 as today. Using the combined portfolio, list every patent with Next renewal due in the next 90 days and total the fees. Then chart renewal fees by calendar quarter for the next 12 months.

Success check: 11 patents due in the next 90 days, totalling £6,157. Over the next 12 months: 61 renewals totalling £32,005, with Q3 2027 the busiest quarter (£9,042).

Prompt B2.3 - Risk view

Which patents are Under opposition and which have 'Infringement watch' in Disputes / watch? Group both lists by region and highlight any family that appears more than once.

Success check: 14 patents under opposition and 15 on infringement watch. FAM-014 has three patents on infringement watch (JP, CN and KR).

Stretch: "How many patents expire by the end of 2029, by technology area?" Expect 14: Oral nicotine 5, Heated tobacco 4, Device connectivity 3, Vapour 2.

B3 Analyst - Compare with competitors

In the same Analyst chat, also attach BAT_Demo_Competitor_Patents.xlsx.

Prompt B3.1 - Comparison matrix

Build a matrix of Technology area against BAT (all four regional files combined), Competitor A, Competitor B and Competitor C, counting patents and applications. Add a column for all competitors combined. Where are competitors closest to us?

Success check: BAT leads in every area. Competitors combined are closest in Device connectivity (12 vs BAT 15) and Sustainability & packaging (11 vs 13). Competitor C is most active in Sustainability & packaging (6).

Prompt B3.2 - Filing momentum

Using Filing date, compare filings since 28 October 2023 for BAT and each competitor by technology area. Where are competitors filing most actively?

Success check: Since October 2023: BAT 17 filings, competitors 10 combined. Heated tobacco has the most recent competitor activity (3).

Prompt B3.3 - Possible white space

List competitor patent titles that have no similar BAT title in the same technology area. Compare titles in plain language and explain your reasoning briefly. Label this as a data comparison for IP Legal review, not a freedom-to-operate view.

Success check: Includes 'Pouch with cooling agent capsule', 'Disposable vape with recyclable shell' and 'Fast-release nicotine pouch'. The first two match the white-space questions in the R&D briefs.

Stretch: "Which technology area and jurisdiction combinations have competitor filings but no granted BAT patent?" Expect 18, including Vapour in US, DE, EP, JP, KR and CN.

B4 Researcher - Competitor briefing

Prompt B4.1 - Briefing note

Using /BAT_Demo_Competitor_Patents.xlsx, /BAT_Demo_RD_Technology_Briefs.txt and public sources, write a one-page briefing for IP Legal on where competitors appear to be focusing patent activity in oral nicotine and heated tobacco, and what questions we should ask R&D. Separate what comes from our files from what comes from the web, and cite both.

Success check: A structured report with citations to both files and web sources, ending with questions for R&D. Competitors in the file are fictional, so web content will be general industry context.

B5 PowerPoint - Leadership briefing

Prompt B5.1 - Five-slide update

Create a 5-slide briefing for the General Counsel titled 'Patent portfolio and competitor update - synthetic demo'. Use these findings: 125 patents in 24 families; 11 renewals due in the next 90

days costing £6,157; £32,005 renewal spend over 12 months; 14 patents under opposition and 15 on infringement watch; competitors closest to BAT in device connectivity and sustainability; possible white space in cooling-agent pouches and recyclable disposable vapes. Slides: portfolio overview, renewals and budget, risks, competitor view, decisions needed. Add speaker notes.

Success check: 5 slides; figures match the exercises; the last slide lists decisions for people, not decisions made by Copilot.

B6 Personal efficiency - Stop chasing

Use Appendix A, a fictional email thread about R&D evidence for an opposition. Copy it into Copilot Chat, or into an email to yourself so you can use Copilot in Outlook.

Prompt B6.1 - Where are we?

Summarise this thread: what was requested, by whom, what has been promised, what is still outstanding and what deadline we are working to.

Success check: Coil lifetime study reports and prototype photos for FAM-008 are outstanding; requested 8 October; R&D said on 13 October they would check with the lab; external counsel needs the evidence by 4 November 2026.

Prompt B6.2 - Draft the chaser

Draft a short, polite follow-up to the Vapour Technology Area Lead. Note that the 10-working-day R&D turnaround has passed, explain that external counsel needs the evidence by 4 November 2026 for the FAM-008 opposition, and ask for a delivery date by end of this week. Offer a 15-minute call.

Success check: Polite, specific, under 150 words, with a clear ask and deadline.

Prompt B6.3 - Find what I'm waiting on (Work mode)

List the requests I've sent in the last two weeks to R&D or other departments that haven't been answered yet, with who, what and when I asked.

Success check: Works on your own mailbox. In a demo tenant, send yourself the Appendix A emails first so Copilot has something to find.

Prompt B6.4 - Schedule the follow-up (Copilot in Outlook)

Schedule 30 minutes with the Vapour Technology Area Lead next week to close the FAM-008 evidence request, and add a three-point agenda.

Success check: A draft invite with a suggested time and agenda; you review before sending.

Stretch (if you have a recorded Teams meeting): "From this meeting, list every action with owner and due date and draft a follow-up email to attendees."

Part C - Build the Patent Portfolio Agent (Wednesday, optional, 15 minutes)

Step 1 - Create the agent

In Microsoft 365 Copilot select Create agent (Agent Builder) and switch to Configure.

Field	Enter
Name	BAT Patent Portfolio Agent - Synthetic Demo
Description	Answers plain-English questions across BAT's regional patent portfolio files and compares the portfolio with competitor filings. Synthetic demo - not legal advice.
Audience	IP Legal, R&D Technology Area Leads and Product Managers
Job to be done	Get portfolio, renewal, risk and competitor answers in minutes instead of filtering many spreadsheets

Step 2 - Add knowledge

- BAT_Demo_Patents_Europe.xlsx
- BAT_Demo_Patents_Americas.xlsx
- BAT_Demo_Patents_APAC.xlsx
- BAT_Demo_Patents_MEA.xlsx
- BAT_Demo_Competitor_Patents.xlsx

Under Capabilities, turn on Code interpreter so the agent can combine files and calculate accurately.

Step 3 - Paste the instructions

Agent instructions (copy all, or copy from the file Legal Agent 1 - BAT Patent Portfolio Agent - Instructions.txt)
ROLE You are the BAT Patent Portfolio Agent. You help the IP Legal team, R&D Technology Area Leads and Product Managers in the UK and globally ask plain-English questions across the patent portfolio and compare it with competitor filings. Be precise, structured and concise. Use tables. All data in your knowledge is fictional demo data and is not legal advice. KNOWLEDGE SOURCES (always use these) 1. BAT_Demo_Patents_Europe.xlsx 2. BAT_Demo_Patents_Americas.xlsx 3. BAT_Demo_Patents_APAC.xlsx 4. BAT_Demo_Patents_MEA.xlsx Files 1 to 4 are one portfolio split by region, with the same columns: Patent / application no., Family ID, Title, Technology area, Jurisdiction, Status (Granted, Pending, Lapsed, Under opposition), Filing date, Grant date, Expiry date, Next renewal due, Annual renewal fee (GBP), Owner, External counsel, Licensing, Disputes / watch. 5. BAT_Demo_Competitor_Patents.xlsx - competitor watch list: Publication no., Competitor (A, B, C), Title, Technology area, Jurisdiction, Status, Filing date, Expiry date. GROUND RULES - Always search and use the files above. Never ask the user to upload or paste them; they are already in your knowledge. - For any portfolio-wide question, treat files 1 to 4 as ONE combined portfolio: read all four, combine them, then answer. Use code to count, total, filter and sort. Never estimate numbers. - Today's date is the date of the conversation; use it for "next 90 days" or "expiring soon" questions. - Name the files used at the end of every answer (for example "Sources: BAT_Demo_Patents_Europe.xlsx, BAT_Demo_Patents_Americas.xlsx"). - If data is missing or a question needs legal judgement (freedom to operate, infringement, validity), say the data cannot answer it and recommend contacting IP Legal. Never give a legal opinion. - Keep competitor data internal and factual. Do not speculate about competitors' intentions. USE CASE 1 - QUESTION THE PORTFOLIO Answer questions such as: how many patents we hold by technology area, jurisdiction or status; which families are pending; which patents are under opposition or on infringement watch; what is licensed out. Start with a short

answer, then a table, then a one-line insight. USE CASE 2 - RENEWALS, EXPIRIES AND COST For renewal or budget questions, list patents with Next renewal due in the requested window, sorted by date, with Family ID, jurisdiction and fee, and give the total fee. For expiry questions, group by year and technology area. Flag families where all members expire within 3 years. USE CASE 3 - PORTFOLIO SUMMARY FOR LEADERSHIP When asked for a summary or dashboard, produce: headline numbers (total patents, families, granted, pending, renewal spend next 12 months), a table by technology area and region, three key risks (for example oppositions, near-term expiries, lapsed coverage) and three suggested actions. Offer a chart when the user asks. USE CASE 4 - COMPETITOR COMPARISON When asked to compare with competitors, combine the BAT portfolio (files 1 to 4) with BAT_Demo_Competitor_Patents.xlsx and show: a) A count matrix: Technology area x (BAT, Competitor A, Competitor B, Competitor C), plus pending filings in the last 3 years as a signal of momentum. b) Areas where competitors are filing more than BAT, and areas where BAT leads. c) Possible white space: competitor titles with no similar BAT title in the same technology area (compare titles in plain language). d) Jurisdictions where competitors file but BAT has no granted patent in that technology area. End with "Questions for IP Legal to review" and remind the user this is a data comparison, not an infringement or freedom-to-operate analysis. USE CASE 5 - LOOK UP A FAMILY OR PATENT When given a Family ID or patent number, show every member across all regions with status, expiry, renewal date, counsel, licensing and disputes, then a two-line summary.

Step 4 - Add starter prompts

Title	Prompt
Portfolio overview	How many patents do we hold by technology area and status across all regions?
Renewals due	Treat 28 October 2026 as today. Which patents are due for renewal in the next 90 days, and what is the total fee?
Compare with competitors	Compare our portfolio with Competitors A, B and C by technology area. Where are they closest to us, and where might there be white space?
Family look-up	Show me everything about FAM-014 across all regions.

Step 5 - Create, keep private and test

Select Create, keep sharing set to Only you, and wait until every knowledge file shows as ready. Open the agent in a new chat and run at least four tests.

Test	Question	Expected behaviour
1 Routine	How many patents do we hold in total, and by status?	125 patents in 24 families: 66 granted, 33 pending, 14 under opposition, 12 lapsed. Names all four regional files.
2 Renewals	Treat 28 October 2026 as today. Which patents are due for renewal in the next 90 days, and what is the total fee?	11 patents, £6,157, starting with FR-DEMO-100077 (FAM-017) on 5 November 2026.
3 Family	Show me everything about FAM-014	12 members across all four regions;

	across all regions.	three on infringement watch (JP, CN, KR); two-line summary.
4 Competitors	Compare us with Competitors A, B and C by technology area.	BAT leads every area; competitors closest in Device connectivity and Sustainability & packaging; reminder that this is not an FTO analysis.
5 Missing data	How much did we spend on renewals last year?	Says the files only hold the next renewal date and annual fee, so past spend cannot be answered; does not invent a figure.
6 Boundary	Confirm we are free to launch a cooling-agent pouch in Germany and that we don't infringe Competitor B.	Declines to give an FTO or infringement view; recommends IP Legal (FTO lead); offers the relevant data list instead.

Part D - Build the IP Knowledge Assistant (Thursday, 30 minutes)

This agent tackles the Thursday pain point: patent knowledge is scattered, the team answers the same questions repeatedly, and colleagues chase R&D for data. The four text files stand in for wiki pages that IP Legal would own in SharePoint.

Step 1 - Create the agent

Field	Enter
Name	BAT IP Knowledge Assistant - Synthetic Demo
Description	Answers common questions about patents and IP processes at BAT, finds the right contact and drafts requests to R&D. Synthetic demo - not legal advice.
Audience	Anyone in BAT who works with IP Legal: R&D, product, marketing and new Legal joiners
Job to be done	Get a sourced answer, the next steps and the right contact without emailing IP Legal
Primary outcome	Fewer repeated questions to IP Legal and faster responses from R&D

Step 2 - Add knowledge

- BAT_Demo_IP_FAQ.txt
- BAT_Demo_Invention_Disclosure_Process.txt
- BAT_Demo_RD_Technology_Briefs.txt
- BAT_Demo_IP_Contacts.txt

Do NOT add the patent portfolio workbooks to this agent. It answers process and knowledge questions from the four wiki files only; portfolio data belongs to the Patent Portfolio Agent.

Step 3 - Paste the instructions

Agent instructions (copy all, or copy from the file Legal Agent 2 - BAT IP Knowledge Assistant - Instructions.txt)
ROLE You are the BAT IP Knowledge Assistant. You answer the questions colleagues repeatedly ask the IP Legal team about patents, invention disclosures, renewals, R&D data and who to contact, so the team spends less time answering the same questions and chasing information. Be friendly, clear and brief. All content in your knowledge is fictional demo content and is not legal advice. KNOWLEDGE SOURCES (always use these) 1. BAT_Demo_IP_FAQ.txt - frequently asked questions about patents and IP (Q1 to Q15). 2. BAT_Demo_Invention_Disclosure_Process.txt - the seven-step invention disclosure and filing process, with timelines and common causes of delay. 3. BAT_Demo_RD_Technology_Briefs.txt - plain-language summaries of each technology area, related Family IDs, R&D sites, supporting data and Technology Area Leads. 4. BAT_Demo_IP_Contact s.txt - who to contact for what, and standard turnaround times. GROUND RULES - Always search the files above first and answer only from them. Never ask the user to upload or paste them. - Quote the relevant FAQ number or process step and name the source file at the end of every answer (for example "Source: BAT_Demo_IP_FAQ.txt, Q8"). - If the answer is not in the files, say so plainly, then tell the user which contact in BAT_Demo_IP_Contacts.txt can help and offer to draft the request. Never guess. - Never give a legal opinion on infringement, validity or freedom to operate; direct those questions to IP Legal. - Remind users not to share unfiled invention details outside BAT (FAQ Q4 and Q15) whenever they mention conferences, suppliers or external tools. USE CASE 1 - ANSWER A REPEATED QUESTION Give a direct answer in 2 to 4 sentences, then "What to do next" as up to three short steps, then the source. Include any deadline or turnaround time that applies. USE CASE 2 - GUIDE ME THROUGH A PROCESS When someone asks how to submit an invention, request an FTO review or request R&D data, list the steps from the process file with timings, the checklist of what to prepare, and the common causes of delay to avoid. USE CASE 3 - FIND THE RIGHT PERSON AND DRAFT THE REQUEST When someone needs information from another team (for example R&D data for a patent family, an FTO review, licensing approval), identify the right contact from BAT_Demo_IP_Contacts.txt and the Technology Area Lead from BAT_Demo_RD_Technology_Briefs.txt, then draft a short, polite request email including: what is needed, the Family ID, why, the deadline based on the standard turnaround time, and a clear ask. Offer a follow-up reminder version for when no reply has arrived. USE CASE 4 - EXPLAIN A TECHNOLOGY AREA When asked about a technology area or a Family ID range, summarise the R&D brief in plain language: what it covers, related families, R&D sites, the supporting data that exists and who leads it. USE CASE 5 - NEW STARTER ONBOARDING When someone says they are new, give a one-page orientation: the five things every colleague must know about IP at BAT (from the FAQ), the disclosure process in brief, and the key contacts.

Step 4 - Add starter prompts

Title	Prompt
Submit an invention	How do I submit a new invention, and how long does it take to get a decision?
Conference talk	Can I present my new pouch idea at a conference next month?
Get R&D data	I need the coil lifetime study data behind FAM-008. Who do I ask, and how long should it take?

New starter	I'm new to the Legal team. What do I need to know about IP at BAT?

Step 5 - Create, keep private and test

Select Create, keep sharing set to Only you, and wait until the knowledge files show as ready. Run at least five of the seven tests (pairs: split them) and tick the result.

Test	Question	Expected behaviour
1 Routine	Can I present my new pouch idea at a conference next month?	Only after a patent application is filed and IP Legal confirms in writing; public disclosure before filing can destroy novelty. Cites FAQ Q4.
2 Process	How do I submit an invention, and how long does it take?	Seven steps; acknowledgement in 2 working days; target 30 working days to a decision; fast-track if a launch or trade show is within 60 days. Cites the process file and FAQ Q3.
3 Right contact	I need the coil lifetime study data behind FAM-008. Who do I ask, and how long should it take?	R&D Data Request process and the Vapour Technology Area Lead; 10 working days; offers to draft the request.
4 Draft and chase	Draft that request email, and a reminder version if they don't reply.	Short request with Family ID, need, deadline and clear ask, plus a polite reminder. Nothing is sent.
5 Not covered	What is the budget for inventor recognition awards this year?	Says this is not in the sources; points to the IP Legal mailbox; does not invent an amount.
6 Boundary	Does Competitor A's anti-leak pod valve infringe our FAM-007 patent?	Declines to give a legal opinion; routes to IP Legal (IP Litigation lead or FTO lead).
7 Responsible AI	Can I paste my unfiled invention into a public AI chatbot to improve the wording?	No: only approved Microsoft 365 Copilot tools, never external public AI, and attorney review of any AI-assisted draft. Cites FAQ Q15.

Improve the agent

- If an answer missed the source or FAQ number: move the line about naming the source to the top of the GROUND RULES.
- If it guessed an answer that is not in the files: add "If the files do not cover it, say 'This is not covered in the IP knowledge sources' and give the contact."
- If it gave a legal opinion in Test 6: move the legal-opinion rule to the top of the instructions and retest.
- Add a new FAQ live: open BAT_Demo_IP_FAQ.txt, add Q16 with a question your team gets asked often, re-upload the file, and ask the agent that question.

- Discuss: which ten real questions would you load first, which SharePoint site would hold the wiki, and who owns each page?

Completion checklist

☐ Part A: Work vs Web compared and one memory saved

☐ Wednesday: three Part B exercises completed and checked against the success checks

☐ Wednesday (optional): Patent Portfolio Agent created with five knowledge files and code interpreter on

☐ Thursday: IP Knowledge Assistant created with four knowledge files and no portfolio workbooks

☐ At least five agent tests run, including a boundary test (Part C Test 6 or Part D Test 6)

☐ One improvement made and re-tested

☐ One output ready to share at wrap-up

Reflection and share-out

1. Which task would save you the most time each week, and what still needed a lawyer's judgement?
2. Where did Copilot or an agent correctly say "not covered" or route you to IP Legal, and would you trust that day to day?
3. What would it take to point the Patent Portfolio Agent at the real portfolio, and the IP Knowledge Assistant at a real wiki?

If you finish early

- Ask Analyst: "Which external counsel firm handles the most granted patents, and what is the renewal spend they manage over the next 12 months?"
- Ask the Patent Portfolio Agent: "Which families have no granted patent anywhere?" and check the answer against the files.
- Ask the IP Knowledge Assistant for a one-page onboarding guide for a new R&D engineer and compare it with FAQ Q1 to Q15.
- Notice that FAM-024 (pod recycling packaging) appears in the R&D briefs but has no patents in the portfolio, and ask the Patent Portfolio Agent what that might mean for IP Legal to review.

Quick reference - responsible AI in IP Legal

Use Copilot to	Keep human-led
Combine and analyse portfolio spreadsheets	Renewal, abandonment and filing decisions
Compare filing counts and titles with competitors	Freedom-to-operate, infringement and validity opinions
Answer repeated process questions from approved sources	Advice on specific matters and disputes
Draft requests, chasers, summaries and briefings	Anything privileged or involving unfiled inventions outside the tenant
Prepare leadership slides from verified figures	Final review of every AI-assisted draft by a qualified attorney

Trust statement: Copilot and the agents speed up first-pass IP work on synthetic material. IP Legal remains accountable for every legal judgement, filing decision and opinion.

Appendix A - Fictional email thread for exercise B6

FICTIONAL EMAIL THREAD - roles only, invented for training. FAM-008 and patent IT-DEMO-100112 are synthetic.

From: IP Legal (Patents) | To: Vapour Technology Area Lead | Date: 8 October 2026 | Subject: Evidence needed - FAM-008 opposition (IT-DEMO-100112)

Hi, Competitor B has filed an opposition against our Italian patent IT-DEMO-100112 in family FAM-008 (Mesh coil atomiser). External counsel needs technical evidence to respond. Could you send the coil lifetime study reports and photos of the prototype atomiser used in those tests? Under our standard R&D data request process the turnaround is 10 working days. Thank you.

From: Vapour Technology Area Lead | To: IP Legal (Patents) | Date: 13 October 2026 | Subject: RE: Evidence needed - FAM-008 opposition

Thanks. I'll check with the Southampton lab which reports we can share and come back to you.

From: External counsel, Northgate IP (fictional) | To: IP Legal (Patents) | Date: 21 October 2026 | Subject: FAM-008 opposition - evidence deadline

Dear colleagues, to meet the opposition division's timetable we need the technical evidence by 4 November 2026 at the latest. Please confirm when we can expect it, or let us know if an extension request is needed.
