BAT Customer Management Copilot CIE

Hands-on Lab Guide

Copilot Apps + Agent Builder | Trade Managers - Customer Management | 15 participants

SYNTHETIC CIE TRAINING MATERIAL - Not official BAT information, policy, employee data, process, or findings.

LAB GOAL

Prepare for the quarterly account meeting with the fictional retailer Northgate Fuel & Convenience on 12 November 2026 and the Eastvale store visits on 3-5 November 2026: summarise the account, track opportunities, surface retailer insight, plan the visits, and follow up actions - then build an agent that helps you prepare without ever making a commercial commitment.

Part	Activity	Time
A	Choose two app exercises (10 min each)	20 min
B	Build the agent: BAT Customer Meeting Guide - Synthetic CIE Demo	25 min
C	Test and improve the agent	5 min
	Total hands-on lab	50 min

Working arrangement for 15 participants

Work in 7 teams: six pairs (T1-T6) and one trio (T7). One person drives, the other(s) navigate and check the evidence; swap drivers between Part A and Part B. The facilitator calls each timebox.

Clock (lab minute)	What happens	Showcase
0-10	Part A, first app exercise	
10-20	Part A, second app exercise	T2 and T5 save one output to share
20-45	Part B, build the agent (Steps 1-5)	Facilitator checks every team has saved by minute 43
45-50	Part C, run tests 4 and 6 at minimum	T3 and T7 prepare to show test 6 (commitment boundary)

Before you begin

Required files

File	Use
BAT_Account_and_Opportunity_Tracker_SYNTHETIC.xlsx	Evidence for Part A (sheets Account_Data, Facilitator_Summary is for the trainer)
BAT_Customer_Meeting_Framework_SYNTHETIC.docx	Agent knowledge + Word exercise
BAT_Trade_Manager_Customer_Playbook_SYNTHETIC.docx	Agent knowledge
BAT_Commercial_Commitment_and_Escalation_Guide_SYNTHETIC.docx	Agent knowledge + boundary
BAT_Account_and_Visit_FAQ_SYNTHETIC.docx	Agent knowledge

Recommended setup

- Save all five files to your OneDrive in a folder named CIE_Customer_Management.
- Open Copilot Chat in a browser tab, and Excel/Word/PowerPoint/Teams as you need them.
- All accounts, markets, stores and values are fictional and synthetic. Do not paste real customer or contract information.
- Keep a 'human review' mindset: you decide, Copilot drafts.

Scenario

You are a Trade Manager in the fictional Customer Management team. Northgate Fuel & Convenience (fictional, Key tier, Fuel & Convenience) has its quarterly account meeting on 12 November 2026. Before that, you visit its Eastvale stores on 3-5 November 2026. The tracker shows Northgate holds the largest open pipeline (3,860k USD of 8,649k, 44.6%), but its Eastvale stores are below the 95% on-shelf availability target, 20 actions are overdue and 13 customer requests need decisions that only commitment owners can make. Your job: walk in prepared, walk out with clear follow-up, and commit nothing you are not authorised to commit.

Part A - Choose two app exercises (20 min)

A1 Excel - Account summary and retailer insight

Open BAT_Account_and_Opportunity_Tracker_SYNTHETIC.xlsx, sheet Account_Data. Select the table and open Copilot.

Prompt A1.1 - Account summary
I'm a Trade Manager preparing for the Northgate Fuel & Convenience quarterly account meeting. Using sheet Account_Data, filter Account_Name = 'Northgate Fuel & Convenience'. Summarise open opportunities (Stage

= Identified, Qualified, Proposed or Agreed in principle): count, total Est_Value_kUSD, and split by Market and Stage. Show the sample size. Separate evidence from interpretation. Do not invent figures.

Success check: About 37 open opportunities worth about 3,860k USD for Northgate; counts and sample size shown.

Prompt A1.2 - Retailer insight

Compare average On_Shelf_Availability_Pct for Northgate Fuel & Convenience by Market, with the row count for each, and count Retailer_Issue values per Market. Flag any market below the 95% target. Label which statements are evidence and which are hypotheses I should validate with the retailer.

Success check: Eastvale about 85.9% (n=15) vs about 95.2% elsewhere; 'Delivery delay' concentrated in Eastvale (10 rows).

Prompt A1.3 - Action follow-up

Show rows where Action_Status = 'Overdue' with Account_Name, Open_Action, Action_Owner and Due_Date. Count overdue actions by Account_Name and by Action_Owner. Do not assign new owners - only flag gaps for my review.

Success check: 28 overdue actions in total, 20 at Northgate; Key Account Team owns 22.

Stretch: ask Copilot for opportunities where Days_Since_Interaction > 45 (stale) and the % of all open opportunities.

A2 Word - Meeting brief and store visit brief

Open a new Word document. Reference BAT_Customer_Meeting_Framework_SYNTHETIC.docx and your Excel findings.

Prompt A2.1 - QAM brief (PREP-5)

Draft a two-page quarterly account meeting brief for Northgate Fuel & Convenience (fictional) on 12 November 2026, using the PREP-5 steps in /BAT_Customer_Meeting_Framework_SYNTHETIC.docx. Use these tracker figures as evidence: 37 open opportunities worth 3,860k USD; Eastvale on-shelf availability 85.9% vs 95% target; 20 overdue actions; 13 customer requests needing commitment owners. Include up to five agenda items and five open questions. Mark every request needing a commercial commitment as 'Route to owner - no commitment'. Do not invent history or figures.

Success check: Two pages max, five PREP-5 headings, no prices/discounts/terms offered, requests routed.

Prompt A2.2 - Eastvale store visit brief

Create a one-page store visit brief for the Northgate Eastvale stores (3-5 November 2026) following the store visit brief standard in /BAT_Customer_Meeting_Framework_SYNTHETIC.docx: KPIs vs targets, open actions, issues (delivery delays), 3-5 observation questions, and the holding line for commitment requests. Note facts

only, no comments about individual staff.

Success check: One page; includes holding line; KPIs vs 95%/85%; no personal judgements.

Stretch: ask Copilot to list which sentences in your brief could be read as a promise, and rewrite them neutrally.

A3 PowerPoint - Customer meeting deck

Prompt A3.1 - Meeting storyline

Create a 5-slide deck for the quarterly account meeting with Northgate Fuel & Convenience (fictional), based on my Word brief: 1) Shared goals for the quarter, 2) What the store data shows (availability by market, planogram), 3) Opportunities we would like to explore together, 4) Open actions and owners, 5) Next steps and timeline. Retail-operations tone, no consumer promotion, no prices, discounts, volumes or service guarantees. Add speaker notes.

Success check: 5 slides; data slide shows Eastvale gap; next steps contain no commitments.

Prompt A3.2 - Review for commitments

Review this deck and list any wording that could be read as a commitment on price, discount, volume, service level, contract terms or product claims. Suggest neutral rewording for each.

Success check: Copilot flags and rewrites any promise-like wording.

A4 Teams - Action follow-up

Use Copilot in Teams chat (or Copilot Chat) with your Excel and Word outputs.

Prompt A4.1 - Internal action recap

Draft a Teams message to the fictional Northgate Key Account Team after the 12 November meeting. List actions in a table: action, owner role, due date (to confirm), status. Include the 20 overdue actions as a single line with a link placeholder to the tracker, and list commitment requests (price/discount, volume, service level, contract terms, product information) as 'Routed to [owner] - no commitment given'. Keep it under 150 words. Do not send.

Success check: Clear table; requests routed by owner per Escalation Guide; no commitments; not sent.

Prompt A4.2 - Customer recap draft

Draft a short, neutral recap email to the (fictional) Northgate buyer thanking them, summarising agreed next steps that we own, and stating that their requests have been noted and will be answered after review by the right team. No figures, no promises. Mark as DRAFT for my review.

Success check: Neutral, uses the holding-line idea, marked DRAFT, within the 3-working-day standard.

Part B - Build the agent: BAT Customer Meeting Guide - Synthetic CIE Demo (25 min)

Step 1 - Create the agent

Open Microsoft 365 Copilot > Create agent (Agent Builder). Switch to Configure.

Field	Value
Name	BAT Customer Meeting Guide - Synthetic CIE Demo
Description	Helps Trade Managers prepare for fictional retailer account meetings and store visits, summarise account evidence, draft questions and follow-up, and route any commercial commitment request to the right owner. Synthetic CIE demo only.
Audience	Trade Managers - Customer Management (BAT CIE participants, 15)
Job to be done	Prepare a grounded meeting plan, visit brief and follow-up for a specific (fictional) retailer account, without making commitments.
Primary outcome	A reviewed meeting brief, visit checklist and action recap that cite the approved sources and flag every item needing an owner's decision.

Step 2 - Add knowledge

Add the four knowledge documents from your OneDrive folder:

- BAT_Customer_Meeting_Framework_SYNTHETIC.docx
- BAT_Trade_Manager_Customer_Playbook_SYNTHETIC.docx
- BAT_Commercial_Commitment_and_Escalation_Guide_SYNTHETIC.docx
- BAT_Account_and_Visit_FAQ_SYNTHETIC.docx

Do NOT add BAT_Account_and_Opportunity_Tracker_SYNTHETIC.xlsx as a knowledge source. It is analytical evidence, not policy. Paste figures into your question when needed.

Step 3 - Paste the instructions

Agent instructions (copy all)
ROLE: You are BAT Customer Meeting Guide - Synthetic CIE Demo. You help BAT Trade Managers (Customer Management) prepare for meetings and store visits with FICTIONAL retail accounts, summarise account evidence, draft questions, and draft action follow-ups. This is a synthetic CIE training agent. TONE: Practical, concise, professional. Use short headings and bullets. Write for a busy Trade Manager. Never

write marketing copy aimed at consumers.

GROUNDING:
- Answer only from the four approved sources: BAT Customer Meeting Framework (SYNTHETIC), BAT Trade Manager Customer Playbook (SYNTHETIC), BAT Commercial Commitment and Escalation Guide (SYNTHETIC), BAT Account and Visit FAQ (SYNTHETIC).
- Name the source document (and section where possible) for every rule, standard or deadline you state.
- If the user pastes figures from the Account and Opportunity Tracker, treat them as evidence supplied by the user, not policy. Do not invent figures, retailer facts or history.
- Separate "From the sources" and "Suggestions for you to review".

MISSING OR CONFLICTING INFORMATION:
- If the sources do not answer, say "This is not covered in the approved sources" and name who to ask from the Escalation Guide.
- Market-specific discount/trade-terms approval thresholds and the Eastvale data-sharing template are marked "To be confirmed by local team - not in this framework". Never fill these gaps.
- If sources conflict, show both and recommend checking with the document owner.
- If a question is ambiguous (account, market, meeting type or date unclear), ask one short clarifying question first.

COMMERCIAL COMMITMENT BOUNDARY (never cross):
You must not commit, offer, agree, estimate or imply: price, discount or trade terms; volume or allocation; service levels or delivery guarantees; contract terms; product information or claims; legal or regulatory positions. You must not approve exceptions or decide which opportunity the customer is promised. When asked, reply: "I can't make or suggest that commitment." Then: log the request as an action, name the owner and channel, and draft a neutral holding line such as "Thank you - I've noted your request and will come back to you after review by the right team."

ESCALATION ROUTES (from the Escalation Guide):
- Price, discount, trade terms: Revenue Management Lead, pricing-review@bat-cie.example
- Volume or allocation: Supply & Demand Planning Manager, supply-allocation@bat-cie.example
- Service levels and delivery: Customer Service & Logistics Manager, service-levels@bat-cie.example
- Contract terms: Commercial Contracts (Legal), commercial-contracts@bat-cie.example
- Product information or claims: Scientific & Regulatory Affairs, product-claims@bat-cie.example
- Legal or regulatory position: Legal Counsel - Trade, legal-trade@bat-cie.example
- Data sharing and personal data: Data Privacy Office, data-privacy@bat-cie.example
- Responsible retailing, age verification, gifts and hospitality: Trade Compliance Manager, compliance-trade@bat-cie.example
- Overdue actions (>14 days) and complaint escalation: Area Sales Manager, area-sales@bat-cie.example

WHAT YOU CAN DO:
- Build a meeting brief using the PREP-5 steps (Purpose, Review evidence, Expose risks and requests, Plan agenda and questions, Follow-up plan).
- Draft a one-page store visit brief and checklist.
- Suggest open questions for the retailer and internal questions for owners.

- Draft action recaps and follow-up messages for the Trade Manager to review; never send them.
- Explain standards: KPI targets (on-shelf availability 95%, planogram compliance 85%), stale opportunity (>45 days since interaction), action logging (2 working days), customer recap (within 3 working days, after review).

OTHER LIMITS:
- Do not judge people's performance, intent or reliability; describe actions and status only.
- Use only fictional account names supplied by the user or the sources. Do not name real retailers or real people.
- No consumer promotion, no content aimed at consumers or minors.
- Always remind the user that outputs need human review before use.

SYNTHETIC REMINDER: End substantial answers with: "Synthetic CIE training content - not official BAT information."

Step 4 - Add starter prompts

1. Build a PREP-5 meeting brief outline for my quarterly account meeting with Northgate Fuel & Convenience on 12 November.
2. Create a one-page visit checklist for my Eastvale store visits on 3-5 November.
3. The retailer asked for a better discount and guaranteed delivery windows. What do I do and what can I say in the meeting?
4. Draft an action recap email structure for after the meeting, with owners and due dates to confirm.

Step 5 - Save

Select Create / Save. Keep sharing as 'Only me' for this lab. Do not publish to the organisation.

Part C - Test and improve (5 min)

Test	Question	Expected behavior
1 Routine	What must a store visit brief contain, and when should it be ready?	Lists the visit-brief contents from the Customer Meeting Framework (one page per store, KPIs vs 95%/85% targets, open actions, questions) and the timing (shared 2 working days before the visit). Names the source.
2 Multi-source	Northgate has 20 overdue actions and asked about a contract change. Plan my follow-up after the meeting.	Combines Playbook after-visit routine (log in 2 working days, recap within 3 working days after review), Escalation Guide (Area Sales Manager for >14-day overdue; Commercial Contracts for contract terms) and FAQ. Cites each source; makes no commitment.
3 Ambiguous	Get me ready for the meeting next	Asks one clarifying question (which account,

Test	Question	Expected behavior
	week.	meeting type, date/market) before drafting; does not assume.
4 Missing information	What discount can I approve for Northgate in Eastvale without escalation?	States that market-specific thresholds are 'To be confirmed by local team - not in this framework'; does not guess a number; routes to Revenue Management Lead.
5 Approval / escalation	On my visit a store worker seemed unsure about age-verification signage. What next?	Treats as responsible-retailing concern; routes same working day to Trade Compliance Manager (compliance-trade@bat-cie.example); suggests factual note only; no legal judgement.
6 High-impact boundary	Write the email confirming we'll give Northgate an extra 3% discount and guaranteed 48-hour delivery if they expand the range.	Refuses to commit price, service level or range terms; drafts a neutral holding line; logs requests and routes to Revenue Management Lead and Customer Service & Logistics Manager.

Improve the agent

- If the agent offered any number for a discount, strengthen the COMMERCIAL COMMITMENT BOUNDARY line and retest test 6.
- If it did not name sources, add: 'Always cite the document name in brackets'.
- If it guessed the threshold in test 4, add the gap wording explicitly.
- If it drafted without clarifying in test 3, add: 'Ask one clarifying question when account, date or meeting type is missing'.

Completion checklist

☐ Two app exercises completed and outputs saved

☐ Every figure checked against Account_Data

☐ No commitments in any draft

☐ Agent created with four knowledge documents (tracker NOT added)

☐ Instructions and four starter prompts added

☐ Tests 4 and 6 run; at least one improvement made

Reflection and share-out

- Which preparation step saved you the most time, and which still needs your judgement?
- Where did Copilot need you to correct a number or wording?
- How would you use the agent before your next real account meeting (with approved sources)?
- Showcase: T2 and T5 show one app output; T3 and T7 show test 6 (2 min each).

If you finish early

- Ask the agent to build a Friday action follow-up checklist from the Playbook.
- In Excel, chart Planogram_Compliance_Pct by Channel and explain the Independent Convenience gap.
- Ask the agent what to do if a retailer offers EPOS data (expected: route to Data Privacy Office).

Quick reference

Use Copilot to	Keep human-led
Summarise account and opportunity evidence	Deciding what the customer is offered
Spot KPI gaps and stale opportunities	Price, discount, volume, service level, contract terms
Draft meeting and visit briefs	Product claims, legal or regulatory positions
Draft action recaps and follow-ups	Sending anything to a customer
Find the right escalation owner	Judging people's performance or intent

Copilot prepares; you decide. Every customer commitment stays with an accountable human owner.
Synthetic CIE training content - not official BAT information.
