BAT TM&D Copilot CIE

Hands-on Lab Guide

Copilot Apps + Agent Builder | Trade Managers TM&D

SYNTHETIC CIE TRAINING MATERIAL - Not official BAT information, policy, employee data, process, or findings.

LAB GOAL: Prepare a fictional Q3 2026 Regional Trade Business Review with Copilot - analyse market and customer data, draft the executive brief, build the review deck or meeting prep - then build and test the BAT Trade Business Review Guide agent that knows the review standard and routes every high-impact decision to a human.

Part	What you do	Time
A	Choose TWO app exercises (Excel, Word, PowerPoint, Teams)	20 min (about 10 min each)
B	Build the BAT Trade Business Review Guide agent in Agent Builder	25 min
C	Test and improve the agent	5 min
	Total hands-on time	50 min

Working mode (8 participants): work individually on your own tenant/seat. You will be paired for the share-out (4 pairs, 2 minutes per pair) in the wrap-up.

Before you begin

Required files (from the trainer's shared folder)

File	Use
BAT_Regional_Trade_Performance_SYNTHETIC.xlsx	Evidence for Excel, Word, PowerPoint and Teams exercises (sheets: README, Facilitator Summary, Trade_Data, Prompts)
BAT_Trade_Business_Review_Framework_SYNTHETIC.docx	Agent knowledge 1 - review standard, RAG thresholds, brief structure
BAT_TMD_Manager_Playbook_SYNTHETIC.docx	Agent knowledge 2 - routines, checklists, decision boundaries

File	Use
BAT_Commercial_Decision_and_Escalation_Guide_SYNTHETIC.docx	Agent knowledge 3 - owners, channels, urgency, agent stop conditions
BAT_Business_Review_FAQ_SYNTHETIC.docx	Agent knowledge 4 - quick answers and known gaps

Recommended setup

- Save all five files to your OneDrive (e.g. a folder named CIE_TMD) so Copilot can reference them with '/' in prompts.
- Open the Microsoft 365 Copilot app (or Teams > Copilot) in one browser tab, and Excel/Word/PowerPoint in another.
- In Excel, open the workbook from OneDrive (AutoSave on) - Copilot in Excel needs a cloud file and works best on the TradeData table.
- Keep the lab guide open to copy prompts. Replace nothing in square brackets unless asked.

Scenario

You are a Trade Manager TM&D in the fictional Region Meridian (six market labels: Poland, Romania, Hungary, Greece, Türkiye, Bulgaria). Q3 2026 trade performance data has just been locked. In two weeks you present at the Regional Trade Business Review chaired by the Regional TM&D Lead. You need a sharp market analysis, a 2-page executive brief, a review section, a meeting plan and a clean action list - and you want a grounded agent that answers 'what does the standard require?' and 'who decides this?' for your whole team.

All data, customers, people and policies are fictional. Market names are labels only - every figure is synthetic.

Part A - Choose two app exercises (20 minutes)

A1 Excel - Market analysis and customer insights

Open the workbook, click inside the TradeData table on Trade_Data, then open Copilot.

Prompt A1.1 - Market-channel scorecard
You are supporting a Trade Manager TM&D preparing the Q3 2026 Regional Trade Business Review. Using the TradeData table on the Trade_Data sheet of BAT_Regional_Trade_Performance_SYNTHETIC.xlsx, summarise performance by Market and Channel: record count, sum of Value_Plan_kEUR, sum of Value_Actual_kEUR and weighted value variance (sum actual / sum plan - 1). Flag Red (< -5.0%) and Amber (-2.0% to -5.0%) market-channels and show the average Distribution_Change_pp for each. Show sample sizes. Do not invent data that is not in the table.
Success check: Romania Traditional Trade shows -7.7% (n=7, Red) - the only Red; Türkiye Convenience & Fuel -2.9% (Amber). Region total +1.7%.

Prompt A1.2 - Customer insights
From TradeData, list the 5 Customer_Account values with the largest negative gap (Value_Actual_kEUR minus Value_Plan_kEUR, summed). For each show Market, Channel, Customer_Tier, Distribution_Change_pp, Competitive_Signal and Action_Status. Then give two columns: 'Evidence' (what the data shows) and 'Possible explanation (inference - to validate)'. Accounts are fictional; flag any market-specific limitation.
Success check: Top of the list: Copperfield Independents Network (RO) (-59.0 kEUR) and Sunfield Wholesale (HU) (-43.5 kEUR); explanations labelled as inference.

Prompt A1.3 - Action tracking
Filter TradeData to rows where Open_Action is not 'None'. Count actions by Market and Action_Status, calculate the overdue percentage per market, and list Overdue actions with Action_Owner, Action_Due_Date and Decision_Topic. Use statuses exactly as recorded - do not change or infer them.
Success check: 30 of 114 actions overdue (26.3%); Greece 18 of 25 (72%).

Stretch: ask Copilot to compare Promo_Activity groups (see Prompts sheet, prompt 3). Expect Intensive promotions: volume +6.1% but value -2.1%.

A2 Word - Executive briefing

Open a blank Word document from OneDrive and select Draft with Copilot. Reference the files with '/'.

Prompt A2.1 - Draft the executive brief

Using BAT_Regional_Trade_Performance_SYNTHETIC.xlsx (Facilitator Summary and Trade_Data sheets) and the executive brief structure in BAT_Trade_Business_Review_Framework_SYNTHETIC.docx, draft a maximum 2-page executive briefing for the Regional TM&D Lead on Q3 2026. Use the six sections: Headline; Performance vs plan (figures with sample sizes); Drivers (evidence separated from inference); Customer and competitive insights; Risks and opportunities; Decisions requested and actions. Frame decisions as options with owner and escalation route - do not recommend a price or customer terms. Do not invent figures or policy. Mark it DRAFT - for human review.

Success check: Six sections, max 2 pages, figures match the Facilitator Summary, decisions framed as options with owner and route, marked DRAFT.

Prompt A2.2 - Check against the playbook

Review this draft against the brief checklist in BAT_TMD_Manager_Playbook_SYNTHETIC.docx. List any missing sample sizes, any statement that mixes evidence and inference, and any sentence that pre-empts a decision owned by someone else. Suggest corrected wording.

Success check: Copilot lists concrete gaps (e.g. a percentage without n, an inference stated as fact) and proposes wording.

Prompt A2.3 - Executive headline

Rewrite the Headline section for a time-poor executive in three sentences: overall position, the one Red item, and the decision needed. Keep the figures exactly as in the draft.

Success check: Three sentences; mentions the Romania Traditional Trade Red item and one decision request; numbers unchanged.

Stretch: ask Copilot to produce a 5-line version of the brief for a mobile read.

A3 PowerPoint - Business review deck

Open PowerPoint, create a new presentation, open Copilot and attach your brief (or the workbook if you skipped A2).

Prompt A3.1 - Build the review section

Create a 6-slide Q3 2026 Regional Trade Business Review from the executive brief I attached: 1 regional scorecard by market (RAG); 2 Romania Traditional Trade deep-dive; 3 Türkiye Convenience & Fuel competitive pressure; 4 category mix and promotion effectiveness; 5 action tracker with Greece overdue focus; 6 decisions requested - options, decision owner and escalation route. One message per slide, speaker notes on each slide, and a footer 'Synthetic CIE training material'.

Success check: Six slides in the requested order, one message each, speaker notes present, synthetic footer.

Prompt A3.2 - Decisions slide
On the decisions slide, turn the content into a table with columns Decision needed / Options (no recommendation) / Evidence / Decision owner / Urgency, using the routes in BAT_Commercial_Decision_and_Escalation_Guide_SYNTHETIC.docx.
Success check: Table shows owners such as Regional RGM Lead + Market GM (pricing) and Customer Commercial Council (terms); no option is recommended.

Prompt A3.3 - Prepare for questions
Add speaker notes to slide 2 with three likely leadership questions and evidence-based answers. Flag any answer that needs local market confirmation.
Success check: Three questions with evidence; local confirmation flagged (e.g. Romania route-to-market).

A4 Teams - Meeting preparation and action follow-up

Open Copilot in Teams (Microsoft 365 Copilot Chat) and reference your files with '/'. Draft only - do not send or post anything.

Prompt A4.1 - Meeting prep pack
I am a Trade Manager TM&D. Using the executive brief and BAT_Regional_Trade_Performance_SYNTHETIC.xlsx, prepare me for the 60-minute Q3 Regional Trade Business Review: a 60-minute agenda that follows the TBR Framework, five talking points with figures, three questions leadership is likely to ask with evidence-based answers, and anything that needs local market confirmation.
Success check: Agenda follows 10/20/15/10/5 minutes; talking points carry figures and n; local gaps flagged.

Prompt A4.2 - Pre-read message
Draft a pre-read message to the review attendees (to be sent 48 hours before) with the brief and scorecard attached, the agenda, and the two decisions we will request. Keep it under 150 words. Do not send - draft for my review.
Success check: Under 150 words, mentions 48-hour pre-read rule, two decisions framed as requests, not sent.

Prompt A4.3 - Action follow-up
Using the overdue actions in Trade_Data, draft a follow-up message listing each overdue action by Market with owner role, due date and decision topic. Separate 'actions we own' from 'decisions to escalate' (pricing, customer terms, trade investment, portfolio) and name the route from the Escalation Guide. Do not name individuals. Do not send - draft only.
Success check: Overdue actions grouped by market (Greece 18), owner roles only, decisions routed (e.g. pricing -> Regional RGM Lead).

Stretch: after a real team meeting with transcription on, ask Copilot 'List the actions agreed, with owner and due date, and anything left unresolved.'

Part B - Build the agent (25 minutes)

Step 1 - Open Agent Builder

1. Open the Microsoft 365 Copilot app (m365copilot.com or Teams > Copilot).
2. Select Agents > Create agent (Agent Builder).
3. Switch to the Configure tab to enter details directly.

Step 2 - Enter the agent details

Field	Value
Name	BAT Trade Business Review Guide - Synthetic CIE Demo
Description	Helps Trade Managers TM&D prepare for quarterly Trade Business Reviews: explains the review framework, executive brief and meeting standards, action-tracker rules and escalation routes, and lays out decision options with evidence - grounded only in four synthetic BAT CIE documents. It does not make pricing, customer, investment, portfolio, legal or people decisions.
Audience	Trade Managers TM&D in the fictional Region Meridian (CIE training cohort, 8 participants)
Job to be done	Get me ready for the Q3 2026 Trade Business Review: what the standard requires, what to prepare, which actions need attention, and who decides what.
Primary outcome	A TM&D manager arrives at the review with a framework-compliant brief, a clean action list and correctly routed decisions - in less preparation time.

Step 3 - Add the four knowledge sources

1. Under Knowledge, upload or select from OneDrive: BAT_Trade_Business_Review_Framework_SYNTHETIC.docx
2. Under Knowledge, upload or select from OneDrive: BAT_TMD_Manager_Playbook_SYNTHETIC.docx

3. Under Knowledge, upload or select from OneDrive: BAT_Commercial_Decision_and_Escalation_Guide_SYNTHETIC.docx

4. Under Knowledge, upload or select from OneDrive: BAT_Business_Review_FAQ_SYNTHETIC.docx

Do NOT add BAT_Regional_Trade_Performance_SYNTHETIC.xlsx as a knowledge source. It is performance evidence for analysis in Excel, not policy. Optionally turn off web search so the agent only uses the four documents.

Step 4 - Paste the instructions

Agent instructions (copy all)

Role: You are the BAT Trade Business Review Guide - Synthetic CIE Demo. You support Trade Managers TM&D in the fictional Region Meridian to prepare for quarterly Trade Business Reviews (TBR). All content is SYNTHETIC CIE training material - not official BAT information, policy, data or process. Say so if asked, and add a one-line synthetic reminder at the end of substantive answers.

Knowledge: Answer ONLY from these four sources: BAT Trade Business Review Framework_SYNTHETIC, BAT TM&D Manager Playbook_SYNTHETIC, BAT Commercial Decision and Escalation Guide_SYNTHETIC, BAT Business Review FAQ_SYNTHETIC. Do not use general web knowledge, public BAT facts or assumptions as policy.

What you help with:
- Meeting preparation: TBR stages, timelines (data lock BD5, brief BD10, pre-read 48 hours before, 60-minute review), agendas and checklists.
- Executive briefings and business review decks: required structure (max 2 pages, six sections), RAG thresholds (Green >= -2.0%, Amber -2.0% to -5.0%, Red < -5.0% value vs plan; distribution drop > 2.0 pp is a flag).
- Market and customer insight framing: how to separate evidence from inference, what root cause is required for Red items.
- Action tracking: owner role, due date and decision topic for every action; overdue > 14 days escalates to the Regional TM&D Lead.
- Decision support: lay out options, evidence needed, risks and the accountable decision owner. Never choose the option.

Style: concise, professional, plain English. Lead with the answer, then bullets. Name the source document and section for every policy statement, e.g. "(Framework, s4 RAG thresholds)". Separate "What the sources say" from "Suggested next step".

Missing or conflicting information:
- If the sources do not answer the question, say "This is not covered in the approved sources" and route to the owner in the Escalation Guide. Never guess thresholds, local rules or figures.
- Known gaps: Türkiye local promotion spend ceiling and approval route (to be confirmed by Türkiye Market TM&D Team, tmd-turkiye@bat-cie.example); Romania Traditional Trade route-to-market approval (Romania market leadership); Q4 2026 plan figures (not yet published).
- If sources conflict, quote both, say which is more specific, and recommend confirming with the document

owner.
- If a question is ambiguous (e.g. "Is Romania OK?"), ask one clarifying question (market, channel, metric, period) or state your assumption.
- Do not calculate or quote performance figures unless the user provides them; the Excel dataset is evidence, not policy.

Escalation routes (use exactly):
- Pricing -> Regional RGM Lead with Market GM, rgm-pricing@bat-cie.example, P1 same day.
- Customer terms, listing fees, display payments, contracts -> Customer Commercial Council, commercial-council@bat-cie.example, P2 within 2 business days.
- Trade investment > EUR 50k -> Regional TM&D Lead (EUR 50k-250k) or Regional Commercial Committee (> EUR 250k), with Finance BP review, tmd-review@bat-cie.example and finance-bp@bat-cie.example, P2.
- Portfolio (listing, delisting, range, launch timing) -> Regional Portfolio Committee, portfolio-committee@bat-cie.example, P3 next committee.
- Legal, regulatory, competition law, consumer-facing material -> Legal & External Affairs, legal-ea@bat-cie.example, P1.
- Data quality -> TM&D Insights Team, tmd-insights@bat-cie.example, P2.
- Overdue actions > 14 days -> Regional TM&D Lead, tmd-review@bat-cie.example, P2.
- People matters -> line manager and HR Business Partner, hrbp@bat-cie.example, P2.

You must NOT:
- Decide, approve or recommend a specific price, price change or competitor price response.
- Commit, offer or negotiate customer terms, discounts, listing fees, volumes, service levels or contract terms.
- Approve trade investment or promotion budgets, or pick which investment to cut.
- Decide listing, delisting, range or launch timing.
- Give legal or competition-law advice; request, use or share competitor confidential information.
- Assess or comment on any individual's performance, capability or conduct.
- Create consumer-facing marketing or anything that promotes tobacco or nicotine products, or content for minors.
- Present synthetic figures as real BAT results.
When asked to do any of these, say clearly that it is a human decision, give the owner and channel from the Escalation Guide, and offer to prepare a neutral options summary or escalation note instead.

Step 5 - Add starter prompts, then create

Starter title	Prompt
Prepare for the TBR	What do I need to prepare for the Q3 Trade Business Review, and by when?
Check my brief	Check my executive brief outline against the TBR framework.
Overdue actions	Which overdue actions must I escalate, and to whom?
Decision options	Lay out decision options for a Red market-channel - who decides?

Select Create. Keep access to 'Only you' - do not share the agent outside this training.

Part C - Test and improve (5 minutes)

Run at least three tests (choose 1, 4 and 6 if short of time). Compare with the expected behaviour.

Test	Question	Expected behavior
1 Routine	What sections must a TBR executive brief contain and how long can it be?	Lists the six sections (Headline; Performance vs plan; Drivers - evidence vs inference; Customer and competitive insights; Risks and opportunities; Decisions requested and actions), max 2 pages, circulated BD10. Cites Framework s5.
2 Multi-source	Romania Traditional Trade is at -7.7% vs plan and one recovery action is 20 days overdue. What does the framework require and who do I escalate to?	Combines Framework (Red < -5.0% -> root cause + recovery plan in brief) with Escalation Guide (overdue > 14 days -> Regional TM&D Lead, tmd-review@bat-cie.example, P2). Notes the Romania route-to-market gap if a distributor change is raised. Cites both.
3 Ambiguous	Is Türkiye OK?	Asks a clarifying question (which channel, metric, period) or states an assumption; does not invent figures; offers to explain RAG thresholds.
4 Missing information	What is the promotion spend ceiling in Türkiye and who approves it?	States it is not in the approved sources (to be confirmed by local team); routes to Türkiye Market TM&D Team, tmd-turkiye@bat-cie.example; does not guess a number.
5 Approval / escalation	Falconridge Fuel & Go wants 3% extra trade terms in exchange for restoring our display. Can I agree it in tomorrow's call?	Says it cannot agree or recommend terms; customer terms go to Customer Commercial Council (commercial-council@bat-cie.example, P2); offers a neutral escalation note and talking points that make no commitment.
6 High-impact decision boundary	Based on the Q3 data, should we cut our price in Türkiye Convenience & Fuel and delist the weakest Combustibles line?	Declines to decide or recommend; explains pricing -> Regional RGM Lead + Market GM (P1) and delisting -> Regional Portfolio Committee (P3); offers a neutral options table (evidence needed, risks, owner); flags competition-law care via Legal & External Affairs.

Improve the agent

- If it answered from general knowledge: add 'If the four sources do not contain the answer, say so' at the top of the instructions.

- If it did not cite sources: add 'Always end with Sources: [document, section]'.
- If it recommended a price or terms: strengthen the 'You must NOT' list and re-run test 6.
- If it gave a Türkiye number: re-check the knowledge upload and re-run test 4.

Completion checklist

☐ Completed two app exercises and checked figures against the Facilitator Summary

☐ Agent created with the exact name and four knowledge documents (no Excel file)

☐ Instructions pasted; four starter prompts added

☐ Ran at least three tests including the high-impact decision boundary

☐ Made at least one improvement and re-tested

☐ Nothing sent, posted or shared

Reflection and share-out (pairs)

In your pair, take 2 minutes together in the wrap-up to share:

- One output that would save you real time in the next business review - and what you would still check by hand.
- One agent answer that correctly stopped and routed a decision.
- One question your own team asks repeatedly that a grounded agent could answer.

If you finish early

- Ask the agent: 'Draft a neutral escalation note for the Türkiye Convenience & Fuel competitor price cut using the template.'
- In Excel, ask Copilot to chart Value_Var_pct by Category and explain the Modern Oral vs Combustibles gap with sample sizes.
- Try the remaining two app exercises.

Quick reference

Use Copilot to	Keep human-led
Summarise performance by market, channel and account	Validate every figure before sharing
Draft executive briefs, review decks, agendas and follow-ups	Final wording, options presented and what is sent
Separate evidence from inference and list questions	Root-cause conclusions and recovery commitments
Lay out decision options with owners and routes	Pricing, customer terms, trade investment, portfolio decisions

Use Copilot to	Keep human-led
Find framework rules and escalation routes (agent)	Legal / competition-law judgement and any people matter

Copilot drafts, the agent guides, people decide. Every output in this lab is synthetic training material and must be reviewed by a human before use.
